

National workshop on

WATER AND WASTEWATER-SUSTAINABLE MANAGEMENT

27 & 28th March 2017

Organized by

**CSIR-National Environmental Engineering Research Institute
&**

**CSIR-NEERI, Chennai Zonal Laboratory
Venue**

CSIR-SERC Lecture Hall

CSIR Madras Complex, Taramani, Chennai 600113

About CSIR-NEERI

The National Engineering Research Institute (NEERI) is a research institute created and funded by Government of India. It was established in Nagpur in 1958 with focus on water supply, sewage disposal, communicable diseases and to some extent on industrial pollution and occupational diseases found common in post-independent India. NEERI is a pioneer laboratory in the field of environmental science and engineering and part of Council of Scientific and Industrial Research (CSIR). CSIR-NEERI has five zonal laboratories at Chennai, Delhi, Hyderabad, Kolkata and Mumbai. NEERI falls under the Ministry of Science and Technology (India) of central government. Chennai Zonal Lab has been a trail-blazer to the industries and society in the States of Tamil Nadu, Karnataka, Kerala and also union territories of Puducherry, Andaman & Nicobar Islands, Lakshadweep in resolving environment related problems and meeting society's needs, ever since its inception in 1969.

About the workshop

Water is our lifeline; in ancient cultures water represented the very essence of life. Water has played a role not only in the history of countries, but in religion, mythology, and art. Water in many religions cleanses the soul through holy water. Nature has an amazing ability to cope with small amounts of water wastes and pollution, but it would be overwhelmed if we didn't treat the billions of gallons of wastewater and sewage produced every day before releasing it back to the environment. Hence, the growing concern on water is water resource depletion and water pollution which needs to be looked into for sustainable wealth. The aim of the workshop is to analyze the problems and bring about the amicable solutions for sustainable management of water and waste water.

Theme of the workshop

**Water Resources Management
Advances in Wastewater Management
Water Resource Augmentation
Integrated Water Resource Management
Algal based water technologies
Zero liquid discharge**

Organizing Committee

**Dr. Rakesh Kumar, Chairman
Dr. Tapas Nandy, Member
Dr. Pawan Labhaestwar, Member
Dr. P.S. Dutt, Convener
Dr. M. Thirunavoukkarasu, Organizing Secretary**

**Dr. R. Sivacoumar
Dr. R.A. Sohony
Mr. Satish Dabe
Mr. Sushant Wath**

**Dr. A.C. Sophia
Dr. T. Rajesh
Mrs. D. Catherine
Mr. S. Kumaresan**

About the Chennai City

Chennai, the capital city of Tamil Nadu previously known as Madras, is located at the North east of the state. Apart from being a major district, this metropolis also serves as the gateway of South India. Representing the Dravidian Civilization, the interesting city of Chennai upholds the music, drama, dance, architecture, arts and crafts and sculpture etc of India. Chennai was mainly the result of the historical accident and the strategic necessity. Symbolizing the rise of the British during the 17th century, in the South of India through the creation and consolidation of the famous East India Company, Chennai was established by the British. The city then acted as the naval base and trading centre for the British. By the end of the 20th century the city had already developed as a major administrative centre.

Chennai is a culturally developed city replete with centres of Carnatic Music and cultural events. Apart from the vibrant theatre life scene Chennai also has a popular film industry with numerous studios Travelling to Chennai, one has a lot of options. Ample number of flights from the country and abroad frequents the city daily. Railways too, connect Chennai to all major cities of India. It can also be reached via road.
